EDUCATION

Sheridan College *Ontario, Canada*
Diploma, Computer Programming *Completed Aug. 2025*

WORK EXPERIENCE

Full Stack Software Developer *Sep. 2026 - Present*
Studio DA

- Develop Bramble, a topology optimization desktop application, across a React/TypeScript/Electron client and Python/FastAPI backend.
- Build guided run setup, material profiles, interactive 3D force controls, iteration playback, and design comparison tools.
- Implement checkpointing, pause/resume, crash recovery, and reliable Windows cancellation for long-running optimization jobs.
- Add portable run import/export and automated tests covering result integrity and resumed runs against uninterrupted execution.

Senior Coding Instructor *Mar. 2022 - Present*
Code Ninjas *Ontario, Canada*

- Teach Scratch, MakeCode Arcade, JavaScript, and Unity to students in instructor-led coding classes.
- Support classes of up to 20 students by explaining programming concepts, debugging projects, and adapting instruction to individual learning needs.

PROJECTS

Personal Media Server | *React, TypeScript, Rust, Axum, FFmpeg, HLS, Codex* Jul. 2026 - Present

- Built a private multi-user media platform with library permissions, device-session controls, audit logs, and private playlists/tags.
- Implemented permission- and quota-checked web-video/magnet ingestion, live progress, and FFmpeg HLS playback with subtitles and resume.

Time Tracker | *Tauri 2, Rust, React, Kotlin, Axum, SQLite, Cursor* Sep. 2025 - Present

- Built a Tauri/Rust desktop app that tracks active app/window usage, with calendar, donut, and trend views, tray controls, and privacy filters.
- Added Android usage tracking and Rust/Axum sync with device approval/revocation; shipped desktop and Google Play closed-test betas.

AlarmPro | *Kotlin, Jetpack Compose, Android, AlarmManager, Antigravity* Jul. 2026 - Present

- Built an Android alarm app with exact scheduling, full-screen ringing, boot recovery, alarm groups, and configurable snooze and vibration.
- Implemented independent multi-stopwatches with laps, alerts, live notifications, and session-specific notification actions.

TikTok Archiver | *Rust, yt-dlp, Headless Chrome, YAML, Cursor* 2026

- Built a Rust TikTok account watcher using browser cookies and yt-dlp, with durable state, bounded retries, and diagnostic logs.

TECHNICAL SKILLS

Languages: Rust, TypeScript, Kotlin, Java, C#, JavaScript, SQL, Python
Frameworks: React, Tauri, Jetpack Compose, Axum, Spring Boot, Tailwind CSS
Tools: Git, GitHub Actions, SQLite, FFmpeg, Android Studio, Visual Studio Code, Figma, Postman
